Zamawiający:	Sørre Sunnmøre IKT
Link do ogłoszenia:	http://ted.europa.eu/udl?uri=TED:NOTICE:196571-2018:TEXT:EN:HTML&src=0
Czego dotyczy:	The competition is for a contract for the delivery of an electronic case / archive system with support / maintenance. This means a complete system for the municipalities and it shall ensure that daily operations function as optimally as possible. Companies that the participants have ownership interests in shall also be able to use the system without extra cost. There will be a strong focus on efficient work processes in the municipalities and a new case / archive system shall support this. The system shall therefore have a close integration between the administrative systems and not at least the professional systems in the municipalities, in such a way that double registrations and unnecessary work processes are eliminated. The Contracting Authority expects the new system to be commissioned 1.6.2019 for all participants, but the contracting authority shall reserve the right to decide when the different parts of the system shall be taken into use. The implementation and use be agreed with the new supplier.
Wartość bez VAT:	b.d.
Termin oferty:	04/06/2018

Status:	Otwarty

Zamawiający:	AIRSYS- Airport Business Information Systems GmbH
Link do ogłoszenia:	http://ted.europa.eu/udl?uri=TED:NOTICE:196293-2018:TEXT:EN:HTML&src=0
Czego dotyczy:	In March 2017, the HAM SulTe system was used to commission the core flight plan processing and flight movement database (AODB) systems. It is a web-based system developed specifically for Hamburg Airport. In this way, the condition for the introduction of A-CDM (Airport Collaborative Decision Making) was created. HAM Suite acts as a leading system in flight operations. The existing resource management systems for immobile resources (large aviation positions, general aviation positions, gates, check-in counters, inbound baggage and outbound baggage) will be replaced by a new system or several system modules. Technologically, the resource management system can be implemented within the HAM SulTe application or connected to HAM SulTe via an Enterprise Service Bus (Mule ESB). The project should be carried out in an agile project procedure.
Wartość bez VAT:	b.d.
Termin oferty:	31/05/2018

Zamawiający:	United Nations University
Link do ogłoszenia:	https://www.ungm.org/Public/Notice/71060
Czego dotyczy:	The GRD is a cross-country dataset of government revenues (broadly: taxes, grants, social contributions, and non-tax revenues) and currently spans 1980 –2015. In 2016, UNU-WIDER partnered with the International Centre for Tax and Development (ICTD) in order to host, maintain, and develop the Government Revenue Dataset (GRD). The GRD is part of the larger project at UNU-WIDER entitled Macro-economic management (M-EM). UNU-WIDER is seeking with this Request for Proposal to contract a professional company to develop a user-friendly, dynamic, query-based interface and visualization tool for the GRD. The objective is to make this large dataset more accessible, usable, understandable, and appealing to a range of users.
